### Quick Release and Worm Gear Clamps

**F**ilter bags and filter elements need accessories too! The proper clamp ensures proper sealing of the filter bags and filter elements. Clamps can eliminate premature filter bag failure and loss of efficiency caused by leaks and abrasion. Midwesco® brand clamps are manufactured to strict quality control standards and tolerances. Midwesco's bands, bridges, and housings are made from stainless steel. Our screw assemblies are 305 stainless steel or dichromate coated.

- Midwesco's Quick Release design allows quick and easy installation.
- The Quick Release lever action virtually eliminates the requirement for screwdrivers and accidental bag puncture.
- Midwesco's Worm Gear design makes clamp tightening easy in restricted areas like bottom-entry pulse jet baghouses.
- Both designs reduces downtime during changouts.

Description	Worm Gear Style	Quick Release Style	Quick Release Style
<ul style="list-style-type: none"> <li>• 301 SS Band</li> <li>• 301 SS House</li> <li>• 410 SS Bridge</li> <li>• Dichromate Screw</li> </ul>	P/N 103-16005	P/N V03-16003	P/N V03-16001
<ul style="list-style-type: none"> <li>• 301 SS Band</li> <li>• 301 SS House</li> <li>• 420 SS Bridge</li> <li>• 305 SS Screw</li> </ul>	P/N V03-16004	P/N V03-16002	P/N V03-16000
