

**“We Take The Dust Out of Industry!”™**

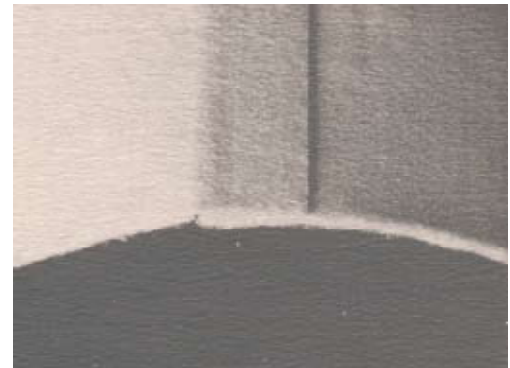

## Increased Performance, Long Bag Life, and Low Cost

Developed by Midwesco® and guaranteed against failure for the life of the material and workmanship warranty, our unique Fused Seam eliminates many of the problems associated with conventionally sewn polypropylene, polyester, aramid, and PPS materials.

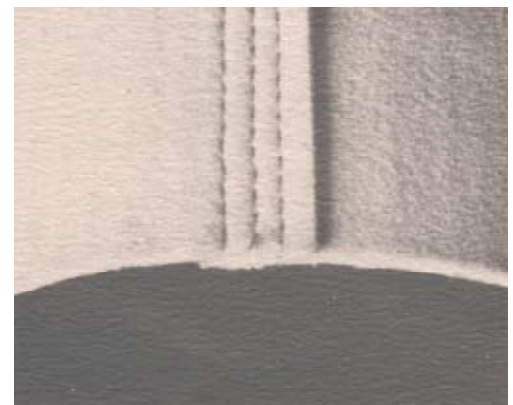

### **Benefits:**

- Fused Seam eliminates “banana” effect caused by threads under tension with conventionally sewn seams.
- Eliminates needle holes and the possibility of seam leakage.
- No threads to wear or break and cause seam failure.
- No bunched seam material to collect particles that cause abrasion failure.
- Highly flexible seam produces better cleaning and flexing.
- Seam reductions provide and increase in effective filtration area.
- Automated production translates in lower unit costs for significant savings.

Unique Fused Seam construction offers added strength, durability, and performance.

Conventionally sewn seams are subject to banana shape, seam failure, leakage and abrasion.
