

# TECHNICAL DATA SHEET

## INSPECTIONS AND CHANGEOUTS

- Avoid the hassle of labor/management disputes over baghouse repair and maintenance.
- Decrease the workload on your already stressed maintenance department.
- Midwesco people are experienced, knowledgeable, diligent, and thorough.
- We warranty our services!

## THE BENEFITS OF UTILIZING MIDWESCO'S INSTALLATION SERVICES

The baghouse is no place for the inexperience or uninspired worker.

Let Midwesco Filter provide experience and competent service crews to inspect, refurbish, renovate, rebuild, convert or maintain your baghouse. *Midwesco knows how to do it!!*

Our field service crews are regionally located throughout the United States to provide prompt and efficient baghouse maintenance services.... even 24 hour service for those emergency shutdowns.

When you entrust your baghouse to Midwesco, you have years of working experience at your disposal. Same day quotations are available for most jobs.

With Midwesco services, it's more than just a bag change. Our years of maintenance experience ranges from those nuisance silo collectors to one million plus CFM baghouse systems. We have serviced them all: Shaker, Shake/Deflate, Reverse Air; Pulse Jet (cage), and Bin Vents.

We have created special tools and procedures to aid our crews without forgoing quality. Our supervisors and crews are experienced, full-time employees.

They know when to repair or reject a questionable cage, how to maintain uniform seam alignment, or properly weave a strap through its hanger. They can snap a bag into the tubesheet and administer the

proper tensioning techniques required for reverse air spring assemblies.

We provide all the necessary maintenance and safety equipment required to do the job. All our equipment is OSHA approved and tailored to the demands of your baghouse. Midwesco crews are OSHA, MSHA, and HAZWOPER trained and certified.

Our observations, work procedures, and maintenance recommendations are provided in a written report at the completion of our work. These reports and recommendations can help head-off potential problems or help fine tune your existing system. Either way, we have saved you money and downtime.
