

TECHNICAL DATA SHEET

MAKE AND HOLD INVENTORY PROGRAM

Take advantage of Midwesco's Make & Hold Program to ensure that you are never caught without filters for a period longer than your business can tolerate. This service is highly recommended for customers who use custom built filters, customers who change out regularly and resellers. Eliminate lead time, sign up today! Midwesco will make your filters today and keep them in stock for you. You can schedule shipment dates at the time of signing up for the program or select the "release on request" option.

Our make-and-hold program works as follows: after order placement, Midwesco would fabricate your bags and hold the finished bags in our inventory for your release. Upon release, Midwesco would ship the bags and bill you accordingly.

By using the above program, you will know up front what your filter bag costs are going to be for the upcoming year. This will facilitate budgeting and save you money by holding prices and protecting you from possible increases.

Contact your Midwesco representative to learn more details of this service and others.
