

TECHNICAL DATA SHEET

PITOT TUBE TESTING & AIRFLOW STUDIES

Midwesco Filter can perform pitot tube testing services and airflow studies in order to assist customers better understand the effectiveness of their baghouse equipment. Our field service crews utilize Dwyer Pitot Equipment to gather and document airflow readings under various operating conditions.

Field data collected is then reviewed with experienced engineering personnel. The review of the field data, along with interview notes from customer stated problems and expectations, allow our team of experts to evaluate each specific area of concern. Written observations and recommendations are then provided to the customer for their review.
