

# TECHNICAL DATA SHEET

## Tadpole Gasketing

Features	Advantages
Available with wire mesh core (Stainless Steel or Inconel).	Resilient under pressure.... springs back upon load release.
Impregnated with PTFE	Low coefficient of friction Excellent chemical resistance.
Available with graphite black coating.	More abrasion resistance than natural white. Black color blends with unit, giving a higher quality of appearance. Graphite black coating is permanent at high temperatures

Manufactured by taking a high temperature core material and fabricating a high temperature fiberglass cover over the core material.... forming a bulb for sealing and a tail for fastening or clamping into position. Service rating to 1000° (538° C). No environmental hazards (non-asbestos). Standard product supplied with fiberglass core material.

### Applications

Boiler Doors  
 Dust Collectors  
 Pollution Control Equipment  
 Brick Manufacturing  
 (Kiln car to Kiln car seal)  
 Industrial Ovens  
 Industrial Furnaces
