

# TECHNICAL DATA SHEET

# CONEX®

## THE OTHER ARAMID FIBER

Since 1969, Teijinconex® has been producing Meta-Aramid fibers. Conex® provides high-temperature (<375° F) resistance, high tenacity, and good chemical resistance, which makes Conex® ideal for a wide variety of baghouse applications.

Conex® fibers have been successfully employed in baghouses in the following industries for many years:

- Minerals
- Metals
- Asphalt
- Power Generation
- Process Chemicals

Conex® fibers are also available in a variety of fiber deniers - 0.9, 1.5, 2, and 5, which allow for their use in Micro Denier and blended density felts. Conex® fibers can also be woven into cotton and woolen system filtration fabrics.
