Midwesco® Filter Resources, Inc.

Press Release

Midwesco® Announces the Next Generation of Spun Bond Polyester Media to Maximize Customer Productivity Demands.

Cicero, IL, February 10, 2006: Midwesco® Filter Resources, Inc. (NASDAQ NM: MFRI) announced today immediate availability of the next generation of 100% Spun Bond Polyester Media, SB' (SB Prime) for their TDC brand pleated filter elements and dust collector cartridges. Independent laboratory analysis and numerous successful installations has proven SB' to provide a higher micro-particle removal effectiveness.

SB' when utilized in a pleated filter product, produces significant improvements in baghouse and dust collector optimization. The fine denier SB' (See Photo to Right) media is recommended for a wide variety of powder and bulk industry applications where micro-particle filtration is essential. Benefits include: extended filter bag life, reduced downtime and maintenance costs, greater efficiency capturing and controlling airborne contaminants, superior release characteristics and improved airflow capacity.

The **SB** (spun bond) media is available in a variety of specialty finishes, including the **SB-HO** (hydro and oleo- phobic finish repelling oil and water, for applications with moderate moisture and oil combination), **SB-ME** (aluminized ant-static surface, for applications needing to meet NFPA 77 regulations*) and **SB-TX** (ePTFE membrane laminate, for applications needing fine particulate filtration).

For more information on SB Prime Media, contact our sales representatives at 800.336.7300 (+1.540.667.8500) or visit us at www.midwescofilter.com for downloadable literature.

About Midwesco® Filter Resources, Inc.

Midwesco® Filter Resources, Inc. is a world leader in dry filtration and dust collection filters since 1968. Midwesco® Filter has developed and maintains one of the largest inventories of dust collector and baghouse bags, cages, accessories, parts and cartridge elements in the industry.

For Release 9 a.m. EDT, February 10, 2006

Midwesco® Filter, along with its subsidiaries, TDC Filter, Nordic Air Filtration and Nordic Midwesco, are committed to providing their clients with the most cost-effective, highest value products and services available that will enhance their baghouse and cartridge systems. It is through continuous improvement in manufacturing processes, raw material acquisition, and technically competent field services that Midwesco® Filter can bring its clients the best value.
